Summary

Front-end developer with a strong foundation in HTML, CSS, JavaScript, and React. Passionate about creating visually consistent, high-performance, and responsive web applications using modern frameworks such as Bootstrap and Tailwind CSS. Currently expanding back-end knowledge to become a full-stack developer. Enthusiastic about leveraging AI tools to optimize workflows and enhance development efficiency.

Education

Tanta University

Bachelor of Engineering in Computer Engineering

Sep 2020 – Jul 2025

Tanta, Gharbia - GPA: 3.0

Experience

NTI — Digital Egypt Youth

Jun 2023 – Jul 2023

C and Embedded C Programming

Tanta, Egypt

- Mastered C programming fundamentals: data structures, algorithms (sorting/searching), pointers, memory management, and low-level hardware interaction.
- Developed embedded systems software using Embedded C, covering memory-mapped registers, preprocessor directives, and startup code for microprocessors.

Digital Egypt Pioneers Initiative (DEPI)

Apr 2024 – Oct 2024

Trainee React Web Developer

Tanta, Egypt

- Developed modern front-end applications using React, TypeScript, and JavaScript, following component-based architecture and best practices.
- Built responsive UIs with HTML5, CSS, and Bootstrap, applying UX/UI design principles for optimal user experience.
- Utilized prompt engineering techniques to integrate AI tools into the development workflow.

Projects

Leon – Creative Agency Website — HTML, CSS

Mar 2022

- Built a responsive multi-section landing page including services, portfolio, about, and contact sections.
- Implemented modern layouts using Flexbox and structured CSS to ensure visual consistency and cross-device compatibility.

Mealify – Restaurant Landing Page — HTML, Bootstrap, JavaScript

Jan 2025

- Built a responsive restaurant landing page with dedicated sections for chefs, gallery, and contact using Bootstrap components and grid system.
- Added JavaScript-based interactions to enhance user experience and dynamic behavior across the website.

W3EY – E-Learning Website — ReactJS

Feb 2025

- Developed an interactive e-learning platform using React and Vite, featuring dynamic navigation and JavaScript-powered content sections.
- Built reusable components and a state-driven UI to improve modularity and user engagement across courses.

UsePopcorn – Movie Rating Web App — ReactJS

Aug 2025

- Developed a movie information and rating web application allowing users to track watched movies and assign personal ratings, with average watch time and rating calculations.

- Implemented state management using custom hooks and built-in hooks such as `useState`, `useRef`, and `useEffect`.
- Integrated a public movie API with proper error handling and utilized `localStorage` to persist user data between sessions.
- Used `PropTypes` to validate component props and ensure data consistency across the application.

WorldWise – Travel Tracking Website — ReactJS

Oct 2025

- Developed a travel tracking web application allowing users to add, store, and manage visited cities using a JSON Server backend.
- Implemented React Router for multi-page navigation and integrated Leaflet maps to visualize visited locations interactively.
- Used Context API for global state management, enabling city notes and automatic date tracking.

Technical Skills

Languages: Python, C++, C, JavaScript

Tools: Visual Studio, VS Code, PyCharm, Figma, Adobe XD, Postman

Frameworks/Platforms: React, GitHub

Web: HTML/CSS, Bootstrap, Tailwind, Redux, Redux Toolkit
